Introduction

About NetinHUB-Smartwatch

NetinHUB-SmartWatch is a mobility app that interacts with the **NetinHUB** system from smart watches to receive **alarms** and **KPIs** in real time, anywhere and any moment, optimising the decision-making process and the response to failures.

Recommendations

- Keep the **NetinHUB-Smartwatch app** updated to the last available version to guarantee all its functionalities.
- Power saving:
 - Set screen brightness to the minimum (Settings/Screen/Brightness).
 - Turn off the option “Always on display” (Settings/Screen/Always on display).
 - Turn off the “Gestures” options (Settings/Gestures).
 - Turn off the connectivity options not needed such as *Bluetooth* and *NFC* (Settings/Connectivity).

WARNING!

The restore of the smart watch to factory settings will unpair it from **NetinHUB** and its settings will be deleted.

NAVIGATION GESTURES

Basic movements

Open menu

1. Tap in the **upper part** **dragging down** to see the menu icon **•••**
2. Tap the **icon** and **drag down** again to open the menu in the **first option**.

Browse the menu

1. Tap and swipe **sideways** (from right to left to move forwards and from left to right to move backwards).
2. Tap an **option** of the menu to access its information.

Moving within views

1. To see the whole content in a view, tap and drag **vertically** up or down.
2. To go back to the menu, tap and drag down to open the menu icon again.

ALARMS LIST

Menu

Alarms list view

No alarms list view
